

KAADY CHEMICAL™

The Science of Cleaning®

CERAMIC DURAGUARD™

A Revolutionary New Extra Service Product

The ceramic-infusion technology that has dramatically enhanced the effectiveness of products used in the detailing industry is now available to automatic car wash operators. It's new Ceramic DuraGuard from Kaady Chemical: giving unprecedented protection to automotive finishes, and offering an unprecedented profit opportunity for you.

Outshining All Previous Protectants

Ceramic DuraGuard delivers a superior shine and extends the life of vehicle finishes by building a polymer barrier that impedes the penetration of heat and airborne acids onto the surface, and makes contaminants easier to remove.

Available Merchandising Support

To remind your customers that the extra protection from Ceramic DuraGuard is more than worth the extra-service fee they'll pay to you, we make available attention-getting driveway or wall-mounted signs, as well as attractive application arches. Call or e-mail us for details.

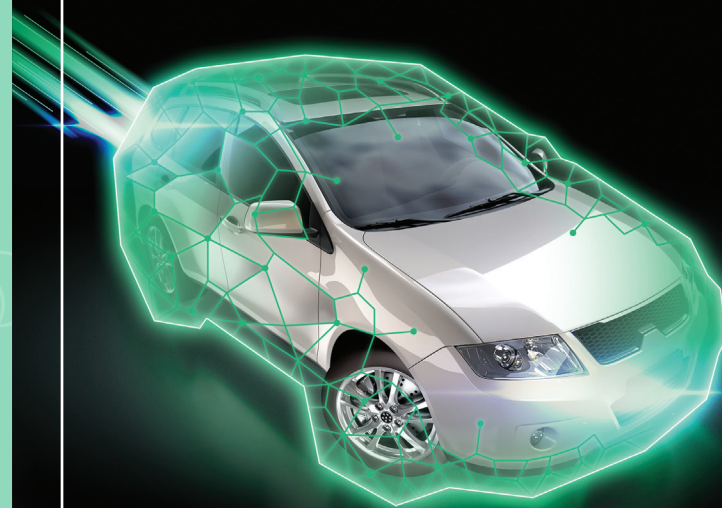

► MIXING & APPLICATION:

Apply through arch. Draw directly from container.
Apply **1/2 oz.** to **3/4 oz.** of concentrated product.
