

KAADY CHEMICALTM

The Science of Cleaning

NØILTM**CONCENTRATED FORMULA****When you can't afford to foul up.**

Solve all the profit-draining problems of hydraulic oil leaks with Kaady's revolutionary, water-based synthetic lubricant. Formulated to perform exactly like hydraulic oil, NØIL has none of its typical problems: No oil in your reclaim, no oil on your customers vehicles, no oil on your cloth or other cleaning media, no petroleum in your sanitary sewer system. (NØIL also solves the problem of oil in your closed-loop system.) And, when it comes to corrosion protection, NØIL has lubricating properties that are actually superior to oil's. What's more, the bright orange color affords quick detection of leaks. (NØIL is compatible with all other water based synthetic lubricants sold to the car wash market. Lab report available on request.)

► MIXING & APPLICATION:

For hydraulic units operating up to **2000 PSI**.

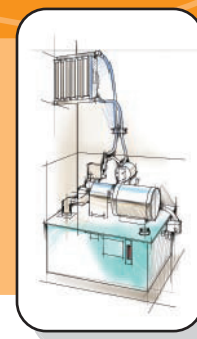

Clean unit completely and purge hyd. lines before adding NØIL. Contact Kaady Chemical for conversion info.

Keep NØIL level high in tank; this will assist in minimizing heat within system. Kaady Chemical recommends installation of the Automatic In-Line Cooling System.

Request E.P.R. or Viton Buna N seals in your pump and motors; use hydraulic hose that is rated for water-based products. Contact Kaady Chemical for guidelines and information.

► ACCESSORIES: Among the accessories available from Kaady Chemical is an In-Line Cooling System (shown here) that can reduce maintenance problems and extend the life of older-type hydraulic units, or of equipment sited in locations subject to extreme room temperatures.

We can also design a cooling system to fit your specific operational needs.
